## Product Description

### Furniture Marble PVC Film for Wall Ceiling Door - OEM Service

#### Product Description:

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

It is available in a wide range of colors, patterns, and textures. It can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

Realsun Deco PVC foil can be applied to various surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in different areas in interior.

Our foil is appreciated for its durability and resilience to deterioration, making it a good choice for high-traffic locations. Upkeep is simple and requires just a weekly wipe down with a moist cloth.

Cost-effectiveness is one of its main benefits, as it makes it possible to create upscale aesthetics without incurring the related expenses. Manufacturers offer a big selection of styles and finishes, enabling modifications to meet individual project and design specifications.

Decorative PVC foil is widely used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

#### Technical Parameters:

We can provide **PVC film** with **excellent thickness**, ranging from 0.1mm to 0.5mm. At the same time, we offer a various width selection, including 1260mm and 1400mm. The length we provide is **100-400m/roll**, providing customers with sufficient quantity. We provide a variety of **designs** for customers to choose from, such as **wood grain, solid color, marble, brick**, and more. Moreover, customers can select multiple **surface treatments**, including **matt, super matt, embossed, high gloss**, and **soft touch**. Furthermore, we provide **OEM and ODM services** to meet customer needs.

#### Applications:

**Membrane Press (vacuum press):** With a thickness ranging from 0.20 to 0.50 mm and a width of 1260mm and 1400mm, this process is suitable for creating rolls of lengths that can range from 100 to 300 m. It can be used to cover MDF, particleboard, wooden board, fiberboard and a variety of other materials for use in doors, kitchen cabinets, wardrobes and furniture. This process can also be employed to cover embossed boards and cover five surfaces together at once.

**Wrapping Profiles:** With a thickness ranging from 0.12 to 0.18mm and a width between 40 and 1260 mm, it can be used to cover all kinds of profiles including wood, aluminum and PVC and is suitable for use in door frames, window sills, base channels and PVC ceilings.

**Cold Laminating:** This type of lamination is appropriate for creating thicknesses of between 0.12 and 0.20mm, with a width of 1240 and 1260 mm, and lengths of up to 500 m per roll. It can be used to cover a variety of flat panels, including wood, steel, aluminum and PVC, and is used for doors and furniture.

**Hot Laminating:** This type of lamination is used to create thicknesses ranging from 0.16 to 0.30mm, and is suitable for widths of 1260 mm up to lengths of 200 to 300 m. It is appropriate for covering PVC panels, steel panels and aluminum panels for use on doors and skirting.

**Self-adhesive:** Self-adhesive lamination is available with thickness options of between 0.10 and 0.20mm and widths of 600mm and 1220mm and is available in lengths of 5-50 m per roll. It is suitable for sticking onto any smooth surface for a variety of furniture and indoor decoration.
