Product Description

Top-Quality PVC Membrane Foil Thickness 0.14mm-0.5mm for Door Lamination

Product Description:

Realsun Deco PVC Foil: Quality and Versatility

Realsun Deco PVC Foil is an incredibly versatile material, perfect for indoor applications in residential and commercial settings. It is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. The Realsun Deco PVC Foil is a great alternative to natural materials such as wood, stone, fabric, or metal. It provides a cost-effective substitute to these materials while still retaining an aesthetic quality. It can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It also readily adheres to different substrates. Additionally, it is incredibly durable, making it a popular choice for applications in high-traffic home and commercial locations.

The Realsun Deco PVC Foil is easy to maintain. Quite refreshingly, it requires minimal upkeep once in place – usually, you'll just need to wipe it down once a week with a moist cloth. This makes it an ideal choice for people with busy lifestyles. Also, it comes at a cost effective price. The affordability of the PVC foil in comparison to natural materials is one of its main benefits, making it possible to create upscale aesthetics without incurring high expenses. It's available in a variety of colors, textures and finishes. This makes it easy to modify the materials to meet project specifications and individual design preferences.

Realsun Deco PVC Foil is an incredibly sturdy and versatile material that is perfect for typical indoor applications like kitchen cabinets, bathroom cabinets, interior doors, wall panelling, furniture surfaces, retail displays etc. Its polyvinyl chloride composition and range of styles and finishes make it an ideal choice for all kinds of project requirements.

Features:

Product Name: PVC Membrane Foil

Width: 1260mm/1400mm

MOQ: 2000-3000m/model

Surface: Smooth, Embossed, Texture, Matte, Super Matte, Soft Touch, High Gloss

Printing: 1-5Color Printing

Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press etc.

Highlight Feature: PVC Sheet, PVC Foil for MDF, PVC Membrane Foil for Door, PVC Membrane Foil for Furniture

Technical Parameters:

Our PVC film is available in a variety of thicknesses, from 0.1mm to 0.5mm. The width are ranging from 1260mm to 1400mm.

The length of PVC film can hit up to 400m/roll. We provide a range of designs for customer's choices, such as wood grain, solid color, marble, brick, etc.

To meet different requirement from customers, we also provide a number of surface treatment options, including matt, super matt, embossed, high gloss and soft touch.

In addition, with the capability of OEM and ODM, we are ready to create the best and individualized products just for you!

Applications:

Membrane Press (vacuum press):

Thickness ranges from 0.20 to 0.50mm while the width is 1260mm and 1400mm. Length varies from 100 to 300m per roll. Considerable items are coverings for MDF, particleboard, wooden board, fiberboard and so on. Those items are able to be applied to doors, kitchen cabinet, wardrobe and furniture. Membrane Press is able to emboss a board and cover five surfaces at the same time.

Wrapping Profiles:

Profiles that thickness varies from 0.12 to 0.18mm with width from 40 to 1260mm and a length range from 300 to 800m per roll can be wrapped on all kinds of profiles including wood profiles, aluminum profiles, and PVC profiles. Applicable items include door frames, window sills, base channels, and PVC ceilings.

Cold Laminating:

Cold laminating thickness lies between 0.12 and 0.20mm with width from 1240 to 1260mm and length from 300 to 500m per roll. Items can cover on most flat materials like wood panels, steel panels, aluminum panels and PVC panels. It is generally used for doors and furniture.

Hot Laminating:

The thickness of hot laminating ranges from 0.16 to 0.30mm with a width of 1260mm and length from 200-300m per roll. It is mainly used for covering PVC panels, steel panels and aluminum panels for various applications like doors, skirting, etc.

Self-adhesive:

A thickness of 0.10 to 0.20mm with a width of 600mm/1220mm and a length range from 5 to 50m per roll is of self-adhesive categories. It can be applied to any smooth surface for furniture and interior decorations.

Packing and Shipping:

The packaging and shipping of PVC Membrane Foil:

PVC Membrane Foil is typically shipped in rolls, with each roll being wrapped in a plastic sheet and secured with packing tape. The rolls are usually labeled with the product name, weight, and the date of manufacture.

The rolls are then placed on a pallet and shrink-wrapped in plastic. The pallet is then loaded onto a truck or train for delivery. The delivery method will depend on the location of the customer and the size of the order.
