- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Length: 100m-400m
- Packing: Pack In Roll
- Material: PVC
- MOQ: 3000m/model
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Service: OEM, ODM
- Thickness: 0.10mm-0.50mm
- Highlight: Interior Home Decoration Embossed PVC Film, Wood Grain Embossed PVC Film

Interior Home Decoration Embossed PVC Film In Wood Grain Design

Product Description:

Embossed PVC Film Characteristics

Material Composition

Our Embossed PVC Film is primarily composed of **Polyvinyl Chloride (PVC)**, a versatile and synthetic plastic. It stands out for its remarkable **strength**, **flexibility**, and ease of processing, making it an excellent choice for various applications.

Visual Appeal

Available in a multitude of **colors**, **patterns**, and **textures**, our Embossed PVC Film presents an economical way to achieve a premium look. It expertly mimics the aesthetics of natural materials such as wood, stone, cloth, or metal, providing an affordable alternative with a luxurious appearance.

Adaptability

The foil showcases incredible adaptability, befitting an array of surfaces including **walls**, **doors**, **cabinets**, and **furniture**. Its versatile nature ensures suitability for diverse interior applications.

Durability

Renowned for its resilience, Realsun Deco Embossed PVC Film maintains its integrity over time. This durability is especially beneficial for areas subjected to heavy usage, as it resists wear and degradation with remarkable efficacy.

Maintenance

Post-installation, our Embossed PVC Film requires minimal upkeep. A simple wipe with a **wet cloth** once weekly suffices, thereby providing an effortless maintenance routine.

Cost-Effectiveness

The affordability of our Embossed PVC Film remains one of its core attractions. Enjoy the look and feel of sophisticated materials without the daunting expense, achieving elegant designs on a budget.

Custom Modifications

With an extensive selection of styles and finishes, we enable modifications to align with specific project directives and personal taste preferences. Manufacturers can offer custom solutions to meet your distinct design needs.

Applications

Versatile in application, decorative Embossed PVC Film is extensively utilized in both residential and commercial settings. Its common uses include **wall paneling**, **furniture surfaces**, **retail displays**, **interior doors**, as well as **kitchen** and **bathroom cabinets**, among others.

Features:

Product Name: Embossed PVC Film

Service: OEM, ODM

Design: Wood Grain, Marble, Brick, Stone, and so on

Packing: Pack in Roll

Length: 100m-400m

Surface: Glossy/Matt/Embossed/Super Matt/Soft Touch

Keywords: pvc door foil, pvc membrane foil, pvc marble film

Applications:

Applications of Different Lamination Processes

1. Membrane Press (Vacuum Press)

Membrane pressing, also known as vacuum pressing, is best suited for materials with a thickness ranging from 0.20 to 0.50mm, available in widths of 1260mm and 1400mm, and lengths spanning 100 to 300 meters per roll. This process is ideal for covering medium-density fiberboard (MDF), particleboard, wooden board, and fiberboard. Common applications include doors, kitchen cabinets, wardrobes, and other types of furniture. Additionally, it is capable of covering embossed boards and can simultaneously cover five surfaces at once.

2. Wrapping Profiles

The wrapping profile technique involves a thickness of 0.12 to 0.18mm, with widths ranging from 40mm to 1260mm, and lengths of 300 to 800 meters per roll. It can be applied to a variety of profile types such as wood, aluminum, and PVC profiles. Its uses extend to covering door frames, window sills, base channels, PVC ceilings, and more.

3. Cold Laminating

Cold laminating films are available with a thickness between 0.12 and 0.20mm, with standard widths of 1240 to 1260mm, and lengths of 300 to 500 meters per roll. The application of this process is vast, as it covers all kinds of flat panels including wood, steel, aluminum, and PVC panels. It is quite versatile, being used for doors and furniture surfaces.

4. Hot Laminating

The hot laminating process uses films with a thickness from 0.16 to 0.30mm, with a consistent width of 1260mm, and length options of 200 to 300 meters per roll. It is primarily used for covering PVC, steel, and aluminum panels, and is commonly employed for enhancing the aesthetic of doors, skirting, and similar products.

5. Self-adhesive

Self-adhesive films have a thickness range of 0.10 to 0.20mm and are offered in two widths: 600mm and 1220mm. The lengths of these films vary from 5 to 50 meters per roll. These films are designed to adhere to any smooth surface, which makes them a popular choice for furniture enhancements and indoor decorations.

Customization:

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days

Payment Terms: T/T 30% down payment, 70% balance before shipment

Supply Ability: 500000m/month

Width: 1260mm, 1400mm
